

The **WebDrive365** solution gives you and any of your users access to unlimited backup for all your chosen data for a low and fixed monthly fee.

**WebDrive365** works in the background as it backs up your chosen data to the cloud. It's very easy to set up and you can access your files from any device with browser access to the internet, including PCs, Macs, iPhones and iPads, Blackberry Android and other mobile devices. There is a specific iPhone/iPad/Android app available for free download from the Apple iTunes AppStore and Android market too!

We would like all SMEs to try the **WebDrive365** solution before making any purchase decisions, as we pride ourselves in offering a mirroring solution we believe in.

**WebDrive365** does not bind your business into a contract or minimum tie-in period with our product, we are determined to ensure that any potential client is completely satisfied that **WebDrive365** is wholly suitable for their needs prior to any purchase decisions taking place, hence our free evaluation...we allow our product to speak for itself.

If you wish to take up a no obligation, free trial of **WebDrive365 Backup**, please email us at:

## Automated hassle-free backup

- **WebDrive365** monitors your files as you work, and backs them up as it detects changes to them - there is no need to remember to hit a "backup" button, or start an application.

## Easily restore files

- Download your files at any time from the web, or restore large numbers of files using the powerful **WebDrive365 Restore** application.

## Unlimited Storage

- It doesn't matter how many files you've got on your computer, or of what type they are - documents, audio, video, databases, spread sheets - we'll back them all up!
- **WebDrive365** backs up all your hard drives and directly connected external <sup>[1]</sup> disks too.

- [1] **WebDrive365** will detect USB drives but there are additional costs to work with SAN, NAS and other networked drives.

## Keeps copies of deleted files

- If you delete files on your computer by mistake, you can easily restore them.
- Unlike competing products that remove deleted files from your backup, **WebDrive365** keeps deleted files for 30 days so you can easily restore them if you need to.

## 100% Secure

- The simple fact is that the security put in place to support and safeguard the **WebDrive365** solution, and its customer's data, will exceed by far the typical security that is used by most SME organisations. All backups made with **WebDrive365** are private, secure and held in state-of-the-art data centres.

**WebDrive365** uses military grade, AES-256 security to encrypt all communications between a user's computer and the servers.

- Data stored on your account is backed up on to multiple storage servers at multiple data centres ensuring your data is fully protected. The network is protected by enterprise-grade firewalls ensuring that once your data is on our servers only the people you want to access your data can do so.

### Up to 30 versions of any file

- **WebDrive365** keeps up to 30 versions of a file; so that you can revert to a previous version should you need to do so. Overwritten an important document? Edited a photo, and wished you hadn't? No problem - you can go back to a previous version with just a few clicks!

### Access it all from the web, iPhone and iPad

- You can access your backed up files from the web, an iPhone or iPad, in fact any device with an internet browser and connectivity. You can even view your photos on-line, and stream music and video directly to your iPhone or iPad!

### Works on Windows and Mac

- Whether you've got a PC or a Mac, **WebDrive365** works in exactly the same way.

### Mobility Online

- All your data is safely stored, whether it be music, videos or documents, and can be accessed from anywhere by PC or Mac, iPhone or iPad.

### Seamless Streaming

- **WebDrive365** and its unlimited storage truly unlocks your iPhone or iPad, but allowing you to stream your media directly from the cloud to your i-device, without using up the device's storage. You can do this via 3G or Wifi whenever you like (your mobile provider's tariff may apply).

### Freedom of Access

- All your data files, photos and media can be stored on your **WebDrive365** account in the cloud, and accessed from anywhere that has connectivity - you never need to worry as to where in the world you are - **WebDrive365** sets you free!

**WebDrive365** is unlimited data storage and mirroring solution for the SME business sector.

As well as supporting our corporate clients, we currently run **WebDrive365** for some of our SME companies such as BT Local Business in London, Oak International Finance, Planners Services & Sundries Ltd, Volante Ltd, and John Palmer Carpets.

If you are looking for complete peace of mind then please talk to us about **WebDrive365**. With this solution you can have all of your precious contacts and documents stored "in the cloud", and accessible "on the move".

Losing your hardware need no longer mean losing your data!
