

BT - LB

WebDrive365 was one of the key factors for BT Local Business (London West) in securing the ISO9001 certification, providing a system to achieve excellence

WebDrive365

The WebDrive365 solution gives you and any of your users access to unlimited backup for all your chosen data for a low and fixed monthly fee.

WebDrive365 works in the background as it backs up your chosen data to the cloud.

It's very easy to set up and you can access your files from any device with browser access to the internet, including PCs, Macs,

iPhones and iPads, Blackberry Android and other mobile devices.

There is a specific iPhone/iPad app available for free download from the Apple iTunes AppStore and Android market too!

web Drive 365 unlimited online storage

We would like all SMEs to try the WebDrive365 solution before making any purchase decisions, as we pride ourselves in offering a mirroring solution we believe in.

WebDrive365 does not bind your business into a contract or minimum tie-in period; we are determined to ensure that any potential client is completely satisfied that WebDrive365 wholly suitable for their needs prior to any purchase decisions

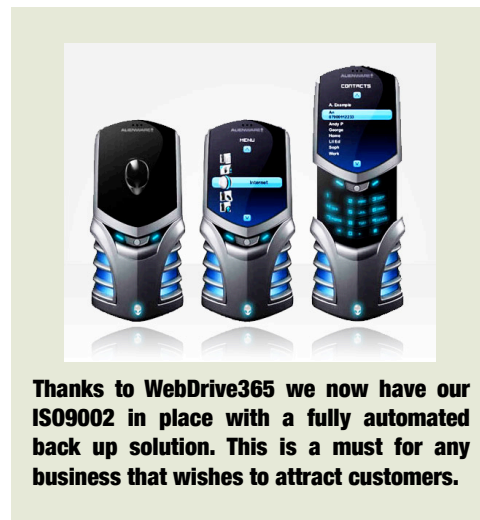

taking place, hence our free evaluation...we allow our product to speak for itself.

The easy solution for any SME

Professionalism is the easiest way to sum up the staff and the solution. At British Telecom Local Business (BTLB) it is imperative that we ensure the best solutions are in place for our business; our customers expect nothing less.

WebDrive365 has exceeded our expectations and was pivotal in helping us gain our ISO9001 accreditation which is an essential requirement for our business. We were initially skeptical that any backup solution could cope with incremental backups such as .pst files especially at the competitive price of your solution, but by allowing us to test it for free before committing, you proved that this was completely

Thanks to WebDrive365 we now have our ISO9002 in place with a fully automated back up solution. This is a must for any business that wishes to attract customers.

possible and that your solution works seamlessly.

I think the fact that you offer unlimited storage for our whole team is also crucial to our work environment: as we are striving to become a paperless office it is essential that every piece of information is instantly backed up off site. WebDrive365 achieves this instantly, not only protecting our sensitive and mission critical data, but

even encompassing personal settings such as internet bookmarks and favorites folders.

I know that many of your team have consulted for some of the largest corporates in the UK and this experience has really lent itself to, and benefitted your company when dealing within the SME market sector, as you provide a hi-end solution and overview with a low-end cost model.

I would personally recommend WebDrive365 to any SME wishing to use a cost effective model to make their data safe and secure.
