

## Testimonial for WebDrive365

# LANTRIX

**WebDrive365**

No need to look down; with your WebDrive365 solution there are no limits.

## TAKE A LEAP INTO CLOUD STORAGE

**Barry Cooke SEO guru gives his views on why WebDrive365 is key to any business that uses technology to store important and relevant data.**

I just wanted to provide some feedback regarding the WebDrive365 solution from a client perspective. I signed up for this service a while ago using your free 1 month trial just to see if was better than my current solutions that I use at work and for some of my clients and did not actually intend to make a purchase. As my company Lantrix currently ranks within the top three of Google's search results for 'SEO SOLUTIONS' I can tell you that I know what I am doing with regards to hosted technology.

I could not believe it but I was completely blown away by your offering not only because I could actually try it for free but the fact that a very technical solution was very un-technical to set up

exceeded all expectations. The fact that you could access the information backed up from any mobile or portable device securely was an added bonus and comes in really useful if you forget something or are out on the road. I love the fact that storage space is not an issue for you guys and the fact you make it unlimited makes this a compelling purchase.

I will have no problems making recommendations to my business associates and anyone who wants a not only backed up but mirrored solution.

Nice

### **It just gets better.**

Also love the fact that I can save over files with the same name and it stores loads of previous versions so I can revert back to information which I thought was gone forever.
